**HISTORY:** There the ice was manufactured and stores in refrigerated chambers of The Marina Auxiliante Market, where the fish was sold. It also supplied ice to the holds of large ships or small fishing vessels. It was built in 1925, when the central warehouse was lower and more open. The warehouse that looks onto calle Eugenia Viñes is preserved almost in its original condition. The other warehouse, which is nearer the sea, has undergone transformations until now, when it was reopened after refurbishment in the independent cultural and creative space, "The Ice Factory", in 2015.
