Introduction

An urban resource is a generic term used to describe the spaces, infrastructures and/or events in the city of Valencia to be used as a testing ground for innovation projects in relevant or real environments¹.

This document sets out information on urban resources, including a brief description and an image, as well as the type, available dates, location, body responsible, date the information was updated and the resource's website.

Type of urban resource

 Space	The type of space encompasses the physical locations set up to test out innovation projects.
 Infrastructure	The type of infrastructure refers to physical or technological elements that can be used to test the latest innovations.
 Event	Event types include specific activities or events for the real-time or simulated testing of innovations, with a specific purpose, duration and scope.

Considerations of the list of urban resources

With regard to “Annex I. Information that must be included in the list of urban Sandbox resources’ of the Municipal Ordinance governing the Valencia Urban Sandbox:

Scopes and capacities (permitted areas of innovation and description of capacities and relevant urban resource-related data)

The information regarding the ‘Scope of Innovation and Capacities of Urban Resources’ is included in the resource description field. By default, any scope of innovation in the urban resource shall be permitted, unless a specific scope of innovation is expressly specified by the body responsible for the resource.

Maps (Google Maps geographic reference of the urban resource)

If available, information can be found on the resource website regarding the geographical reference of the urban resource. Furthermore, a GIS layer of the City Council will be published, to streamline the process of consulting the Sandbox urban resources.

Guarantees (Minimum guarantee required to use the urban resource)

The Promoting Entities must take out civil liability insurance policy to cover possible damages to members of the promoting entity and third parties during the experimental tests of the innovation project set forth in the Test Protocol. Furthermore, the minimum guarantees required to use the urban resource are set out in the Test Protocol where this amount must be calculated by examining, assessing and quantifying the specific assets or infrastructure of the resource that may be affected as a result of the testing, depending at all times on the characteristics of the activity and innovation project².

The Promoting Entities hereby **accept the following conditions and assume liability for the use of the Valencia Urban Sandbox³:**

1. **Valencia City Council shall not be held liable with regard to any possible damages** that may arise while the innovation project is being tested in the Valencia Urban Sandbox, except on grounds attributable to the City Council, in accordance with the terms set forth in the applicable legislation on the liability of Public Administrations.
2. Should any **participants**, while the innovation projects are being tested, suffer **personal injury or damage is caused to property due to causes attributable to the Promoting Entity, they shall be compensated by the Promoting Entity**, in accordance with the liability and guarantees regulation agreed in the **Testing Protocol**.
3. In such cases, the **entity shall make up for** the damage caused by **restoring** the assets to their previous condition if possible and, if not, by **restitution** thereof.
3. Should the replacement nor the restitution of the assets not be possible, the Promoting Entity must **compensate for the damage for an amount equal to the value of the damaged assets**.
4. Without prejudice to the regulations on infringements, penalties and **liability** that may be stipulated in any other regulation of the legal system (civil, environmental, etc.).

RUSBX-013 – IDE CAMPANAR A

The *Instalaciones Deportivas Elementales* (IDE) in Valencia are free spaces that the general public can avail of, giving them the opportunity to do sports outdoors. Campanar's *IDE número A* has a skate park, two 3-a-side football pitches, two mini-tennis courts and two mini-basketball courts. Because these facilities share the same space, they are used on a rotating and impromptu basis depending on the interests of the users using the facilities at any given time. It was built in 2009 and has a total surface area of 1,923 m². Its location fosters use by the general public as it is located a stone's throw from a number of educational institutions as well as a kids' park.

RUSBX-090 – LAS NAVES BRILLEN

Las Naves Brillen is a trailblazing renewable energy project that strives to turn Las Naves, one of Valencia's leading hubs for socio-urban innovation, into a benchmark in the field of energy transition. The project consisted of installing photovoltaic panels on the roof of the building, which will generate enough clean energy to cover its own consumption and even feed the surplus back into the grid. The Local Energy Community of Las NAVES has a 100 kWp photovoltaic installation.

The installation has an electrical energy generation plant using photovoltaic solar modules, comprising a total of 216 500Wp modules (resulting in a 108 KWp solar park), a system for inverting direct current to alternating current and the protection and measurement systems necessary for this type of installation, for self-consumption of a large part of the electrical energy generated and for feeding the excess back into the electricity grid. The photovoltaic modules are to be IBEX 132MHC Black Frame 500 Wp manufactured by Swiss Solar AG or similar. To guarantee that the models offered are of comparable quality, the similar manufacturer is required to be listed as TIER-1, a classification drawn up by Bloomberg New Energy Finance Corporation (BNEF) in its quarterly report to subscribers.

RUSBX-099 – LA MASCLETÀ

A pyrotechnic event that brings together tens of thousands of people in and around the City Council square. It is estimated that up to 150,000 people may gather in Valencia's *Plaça de l'Ajuntament* to watch the fireworks display, in particular the display on 19 March, the big celebration known as *Dia de Sant Josep*, and the fireworks displays that take place on the weekend in the days leading up to it. *La Mascletà*, that gets lots of media attention, is the perfect stage for companies to showcase innovations in a creative and unforgettable way. The visual and auditory nature of the event gives companies the perfect opportunity to showcase their latest products or services in an attractive way, capturing the public's attention and creating excitement. In this way, the event is deeply rooted in Valencian tradition, offering a unique framework to strike the perfect balance between innovation and cultural identity. By showcasing their latest innovations within the context of this huge cultural event, companies can create an engaging narrative that resonates with audiences while strengthening their brand image.

RUSBX-100 – LA CRIDA

As part of Las Fallas celebrations, this event brings together tens of thousands of people at Torres de Serrano (Serranos Gate), with crowds of over 100,000 showing up to the last few events. This is the official event that marks the beginning of *Las Fallas*. Held every year on the last Sunday in February, it consists of a call to the celebrations by Valencia's *Falleras Mayores*. *La Cridà* is a symbolic gesture to awaken the city and kick-start the festival. With this 'call', the *Falleras Mayores* call on all Valencians and visitors to enjoy the Fallas, a festival brimming with joy, colour, tradition, not to mention gunpowder. Just like *La Mascletà*, it opens up a one-of-a-kind opportunity as a potentially innovative space due to the blending between its visuals and sound.

RUSBX-106 – MERCAOBRADOR

Mercaobrador is a large-scale project that tackles various topics with view to invigorating the agricultural sector in Valencia and its peri-urban area. This ambitious project seeks to drive a number of different innovative projects, making the most of the strengths of two key entities such as Mercavalència and Las Naves. Mercavalència, as a mature and structured organisation, provides the capacity to bring together and attract the primary sector at the marketing stage, as well as having enough space to develop the project. Whereas Las Naves brings its experience to the table as a hub for supporting, fostering, coordinating and invigorating innovative entrepreneurship in the strategic agri-food and food health sector, calling on the support and knowledge of the academic and research sector. The synergy between Mercavalència and Las Naves enables tackling the challenges of the agricultural in a comprehensive and effective manner, while boosting innovation and sustainable development in the region. The project envisages the creation of a 'white workshop' that will also be used as an agri-food 'laboratory'. This space will be located within Mercavalencia's Multi-services building and will be designed to house and develop versatile innovative projects geared towards specific actions. These are those relating to developing and incubating agri-food companies due to their innovative nature in treating, processing, preserving and marketing organic vegetable products and supporting micro-enterprises and entrepreneurs who offer, develop and foster activities to process and elaborate vegetable and other primary sector products to meet the diversification needs of farmers in other short-circuit marketing channels, adding value to agricultural products.
